

GEORGETOWN COACH
LOOKS OVER SQUAD

Neilson Gets Line on Material Before New Rules Are Tried.

town University squad are dropping into town on every train and are settling down to hard practice under the leadership of Coach Neilson, who was formerly with George Washington University. Twenty husky fellows tumbled onto the field yesterday afternoon, several of whom are new to the team. Monday during the first practice of the year. Members of the last year's eleven who showed up yesterday were Captain Dalley, Carter, Smyth, Stohlman, and Vlymen. Although practice has just started, many new candidates have reported for duty, among whom is Cuthbertson, the popular mechanical High School quarterback who has been quite a reputation, not only in football

Two other new members who have reported are Hegarty and Kraft, both of whom are big game bowlers and are to be in fine condition. Wylmen brought his brother back with him from a school where he had played the Hempstead eleven, Long Island, and if looks are so for anything, he will definitely be a valuable addition to the team. Furry, after a three years' vacation from the college, reported again yesterday and is expected to be in the lineup before Costello, from Meriden, Conn., looks to be a valuable addition for the season. Furry made his first appearance on the field yesterday.

Today will see a number of others on the field, both old and new faces. From all appearances so early in the season, Coach Neilson will have no trouble in getting together a fast bunch of play-

ers for the coming season. Georgetown was lost but four players out of last year's team, Denton, left tackle; McNulty, quarterback; Byrd, quarterback back; and Smith, fullback, were lost. From the material no won hand it should be a hard job filling their places with capable men.

By morning will see all of the students at their desks, as college opens for the winter term. It is expected that the new students will be as old as well as the new students will be on hand. Football practice was started last week and will continue more than it ever has before, which will be a great advantage in straightening out the boys and making them firmly implanted in their minds.

Field and Track

The New York A. C. will not send a team to the Canadian championships, as the club will hold its own games on that date. A strong team will be sent to the national championship meet.

however.

In the fall, just after the following the New York A. C. victory at Travers Island last Saturday, Dick Edwards, the new quarter-mile champion, was almost certain to mount the hopalong, his comrades. He is starting around the track under his right eye the size of a young man's. According to his physician it will take him about a month to get over the bump.

Joe Brownlow has only himself to blame for losing out in the half-mile run at Travers. He came in with a lead and the pace in a race of this kind, and it was his badly judged play for first position. Across him the race and the New York A. C. a chance to grab four extra points in the race for the title.

The victory of Gumpfelt in the senior championship high jump was rather remarkable, considering that he was not even in the running. He came in as a one-man jumping party, however, and this accounted for it.

If the Irish-American A. C. does not land a pole vaulter who can clear higher

hard proposition for the club to win the national title. With Claude Allen and Eddie Cooke out of active competition the club has been left with only a few mediocre performers.

Rube Bell, of the Mohawk A. C., was a discouraged athlete after the big meet. The smaller character ran a fine race, but the time was too fast for him and he had to content himself with fourth place in the final.

With Eggon Ericson out of the big event, the Mott Haven A. C. did not score a single point at the championships. The club's manager is a sick man, and a rest for a year from competition will do him a lot of good.

SKIN DISEASES

HUMORS IN THE BLOOD

Nature has made ample provision in the moisture and sunshine of the air for the outward protection and healthy condition of the skin. But the more important work of nourishing the cuticle has been left to an in-

ward source—the blood. It is from the circulation that the pores and glands receive their stimulus, and the fibrous tissues are all preserved in a healthful state because of constant nutriment supplied by the blood. It is only when the circulation becomes infected with humors or acids that we are troubled with

skin affections. The humors producing these troubles are carried through the circulation direct to the skin, and their irritating or inflammatory effect remains until the blood is cleansed. S. S. S. cures Skin Diseases, because it is the greatest of all blood purifiers. It goes into the circulation and REMOVES the acids and humors which are causing the trouble.

S S S

Rheum, pimples, rashes, and all eruptions of the skin. When S. S. S. has driven out the humors the skin is again nourished with cooling, healthful blood, natural vaporation is renewed, and the skin becomes soft and smooth. Book Skin Diseases and medical aid free.
